DESCRIPTION DU COURS

Cours de niveau supérieur permettant d'acquérir ou de consolider les habiletés en communication scientifique, tant à l'oral qu'à l'écrit. Ce cours est réservé aux étudiants dont la langue maternelle n'est pas l'anglais avec un classement supérieur.

OBJECTIFS

This course is designed for students who are currently working on a research project in their field of study or planning to work on a project in further studies. As a complement to this type of project, and with the goal of carrying out research at a future date, the student who chooses this course will be introduced to 1) the goals of the various sections of the research study with a focus on the review of the literature section; 2) techniques for concise and scientific writing; and 3) presenting efficiently and effectively in English with the use of pertinent communication strategies.

Writing

Students will work on various types of academic writing and learn to produce grammatically correct writing which follows specific guidelines. In addition, students will learn to employ techniques of effective writing. Students will learn how to produce effective visual support and select appropriate technological tools.

Speaking

Students learn to produce both structured and spontaneous oral communication which is clear and complete for academic purposes and audiences.

CONTENUS

1. Developing editing techniques.

2. Extensive grammar review which will target individual needs, and some common to the group.

3. Assigned reading and vocabulary development.

4. Informal oral presentations and/or debates.

5. Formal writing tasks.
